Dear Ladies and Gentlemen,

Polymer Latex GmbH has been employing the services of HMGT Hansa Meyer Global Transport, Bremen, Germany since 2008 in conjunction with our chemical plant project activities in Malaysia.

Our heavy and over-dimensioned equipment originates from Italy and China and the general cargo / containerized cargo is commonly purchased from Europe, Scandinavia, India and Asia. For the majority of this project, HMGT was responsible for the complete transport of about 20.000 freight tons including heavy lifts up to 87 tons from FOB port of loading up to site area located in Pasir Gudang, Malaysia.

We have found HMGT to be a competitive, skillful and extremely service orientated partner in their dealing with companies, subcontractors and customers. We consider their expertise in the fields of trucking, sea freight including part charter, customs clearance and organization. Due to their diligent pre-planning and scheduling we have been able to complete the majority of our project in time and within the freight budget allocations.

Polymer Latex greatly values their relationship with Hansa Meyer Global Transport and has every intention of employing them for further projects. We would unconditionally recommend their services to any other party in a field of business similar like ours.

Yours sincerely

PolymerLatex GmbH
